

## Kemox

# Kemet

Kemet offer a comprehensive range of suspension treated abrasives where the abrasive and carrier are pre-mixed in the correct proportions, resulting in a cleaner and more efficient Lapping Process.

Kemox is a conventional lapping abrasive that has been suspension treated so that the abrasive particles do not settle out into a hard sediment in to bottom of the abrasive tank. Kemox is available in water soluble (Kemox –W) or oil soluble (Kemox-O) formulations in 5 or 25 Litres.

Advantages of using Kemox include:

- No mixing necessary.
- Abrasive concentration is always correct.
- Always ready to use.

**KEMOX**

Description	Size	Code	Details
Kemox O-950	5 Ltr	300102	Oil Based. Finer surface finish on soft components
Kemox O-800S	5 Ltr	300112	Oil Based. General aluminium oxide lapping where a scratch free matt lap is required
Kemox O-400S	5 Ltr	300111	Oil Based. Plate conditioning and matt lapping where good stock removal and a matt lap is required
Kemox W-950	5 Ltr	300152	Water based where oil can't be used. Finer surface finish on soft components
Kemox W-800	5 Ltr	300143	Water based
Kemox W-400	5 Ltr	300141	Water based
