

## Platos de lapeado

# Kemet

Ofrecemos un servicio de intercambio de los platos de lapeado Kemet desgastados. Disponibles en fundición de hierro y aleaciones ligeras para la mayoría de máquinas.

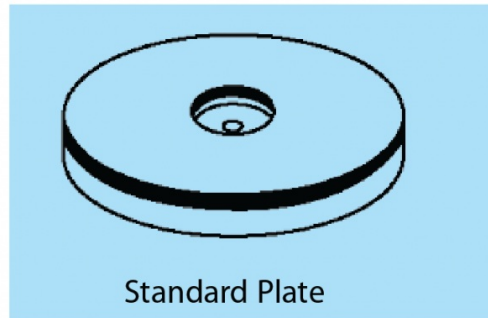

Kemet puede suministrar platos lapeadores Kemet para todos los modelos de máquinas lapeadoras, incluyendo platos segmentados para máquinas de 48 pulgadas o mayores. Se dispone también de anillos con caras de contacto cerámicas o plásticas para su uso con paños de pulido.

## PLATOS DE LAPEADO

### Standard Kemet Lapping Plates

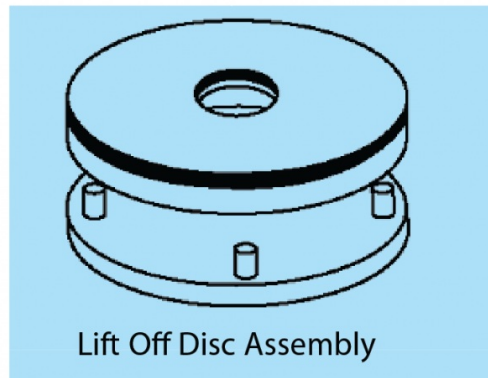

These plates are normally supplied mounted on a cast iron backing plate for maximum stability. They are recommended for general and heavy-duty work where high precision flatness and surface finish are required.

Standard Plate

### Kemet Lift Off Disc System

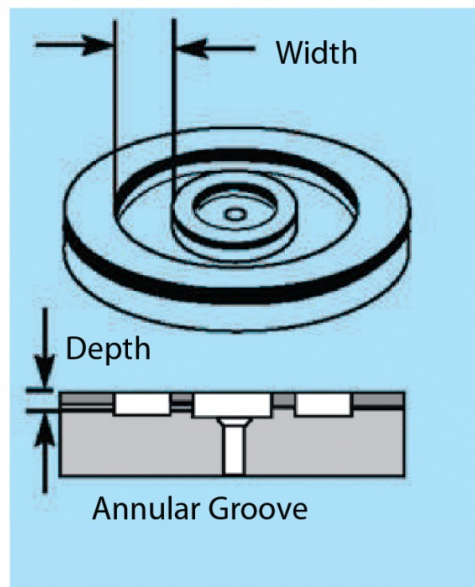

Kemet Lapping Plates are also available as Lift Off Discs, for machines up to 610mm (24") diameter. Discs are supplied mounted on an aluminium backing plate, which locates on to an aluminium drive plate by means of three pegs. Lift Off Discs can be easily changed and are recommended for light duty work where general flatness and precision finish are required.

Lift Off Disc Assembly

### Kemet Annular Grooved Plates

These plates are designed for precision shoulder lapping of a wide range of parts, such as fuel pump gear faces and pressure relief valve caps. Groove width and depth of plates need to be specified when ordering.

## Grooving

Kemet Lapping Plates can be supplied grooved to suit specific applications.
